

THORNHILL CENTRE FOR HEALTHY LIVING

This project involved the demolition of the existing clinic building and the construction of a new two storey clinic building, which links to the adjacent GP Surgery with a shared lift, stairs and reception.

The building comprises on the ground floor, a shared waiting area and entrance, Consulting Rooms, Child Therapy and Interview Suite, Health Education and Play and Stay meeting rooms. The first floor comprises, a dental suite of two surgeries and waiting area, family support offices and associated toilets and staff facilities.

The building is of traditional construction, clad with different coloured facing brickwork, render and pitched metal roof, with enclosed external playground areas for children. A mosaicist designed panels based on artwork by the Thornhill community, which are fixed to the building.

CLIENT: SOUTHAMPTON CITY PRIMARY CARE TRUST
