

# Ward block and CCU St. Mary's Hospital

Appointed in Jan 2003, S4 are lead consultants for the proposed new 8 bed CCU, with 12 bed Stepdown ward and Cardiac Outpatients unit on ground floor, and at least one further floor of 30 bed general ward over. A decision is currently awaited for a third floor which will contain a further 30 beds.

Currently at detail design stage, a Planning application is submitted for the full three storey scheme.

The design is arranged around a square pattern with all ward accommodation to the outside gaining full benefit from natural daylight and ventilation. The core contains utility accommodation, with stairs in opposing corners for access and evacuation.

CLIENT: Isle of Wight Healthcare NHS Trust

LOCATION: St. Mary's Hospital, Newport

COMPLETION: Autumn 2004

VALUE: £5,500,000
