

SPARSHOLT COLLEGE

NEW RECEPTION AND D.D.A. WORKS

Following the results of a D.D.A. Audit, the College issued a competitive Fee Tenders for the relevant Architectural Duties to carry out various improvements around the campus.

Studio Four were appointed to prepare feasibility schemes to address the shortfalls highlighted in the Audit, particularly the original College "Main Building" and the "ICT Centre" teaching block.

The Main Building works include the opportunity to relace the existing College reception with a new extension housing reception itself, a lift and waiting area. A new reception office, waiting area and accessible W.C.s were created within the existing building to complement the new facilities. In addition various other internal improvements were carried out.
